### Product Outline

**Background:** This product is important to me because a lot of diabetics have trouble controlling it. Also, because of this a lot of diabetics are unhealthy, so by providing a kit that has all of the resources needed in the daily life of a diabetic will be helpful. This could also encourage diabetics to take better care of their diabetes.

**Purpose:** To help diabetics be healthier, have a healthy alternative for raising their low blood sugars, and to carry around their supplies.

**Description:** Making a kit that will have honey black seed “candies” or a vial filled with it that they can take in one shot, along with a short manual that will contain advice, information, and the background of this kit.

**Materials:** -Plastic Container, or small pouch.

-One sheet of paper that will be folded for manual

-Honey

-Black Seed

**Expected Outcome:** That this small kit will be beneficial for diabetics in the local community, and that the diabetics will enjoy having it with them, and they will learn a bit more about healthier ways to treat their diabetes.
